What is the COVID-19 Vaccine about?

The vaccine is like getting thousands of fierce little warriors that will help protect you from COVID-19 and not get as sick if you get it.

If you do get COVID, the vaccine will also help stop you spreading COVID to your family and loved ones.

The more people that have the vaccine, the more that community can be protected from COVID.

Find out more on the
Australian Government
Department of Health
Website

If you are worried about the vaccine and need more information, talk to your doctor for the best advice and the right information for you. Or call the National Coronavirus and COVID-19 vaccine helpline on **1800 020 080**
